PROFESSIONAL EXPERIENCE

Software Developer (Python)

Jan 2023 – Present

IGL Web Ltd (IGL Group)

Dhanmondi, Dhaka

- Develop and maintain client web solutions with Python, Django, PHP, Laravel, and MySQL, maintaining a 100% customer satisfaction rating.
- Enhanced the Online Ticketing System and Visa Management platform, extending functionality and modernizing user interfaces.
- Contribute to platforms across HR, bulk SMS, ERP, web hosting, recruitment, e-commerce, and eSIM distribution, working with the team on design specs using Git and Docker.

KEY PROJECTS

IGL Workforce – Attendance & Payroll HR SaaS

workforce.iglweb.com | Sep 2026 – Present

- In a two-person team, integrated ZKTeco fingerprint and face devices and built the engine that turns scans into daily attendance: check-in/out, breaks, late, overtime, and missed scans.
- Built a 300+ endpoint REST API secured with API keys, two-step login, and rate limits, and cut database queries per attendance page from 677 to 27 by caching computed results.
- **Tech Stack:** Python, Django, DRF, PostgreSQL, ZKTeco, Swagger | **API Docs:** workforce.iglweb.com/api/docs/

IGL Bulk SMS Portal – Bulk Messaging Platform

sms.iglweb.com

- Web portal for sending bulk SMS messages, with secure user login and phone-number-based password recovery.

IGL Flexiload – Corporate Mobile Recharge Platform

flexiload.iglweb.com

- Built with Python and Django: sends mobile airtime loads to subscribers through telecom operators on behalf of corporate clients.
